Dear Mr. Mitealf, Editor,

Do I understand correctly that you occasionally publish in the Journal, say in the rear or as fillers, short articles that are not official papers. If so, what would be the latest date for copy for the April issue. About a column.

I am preparing a paper for the June meeting. It has been accepted, but I am re-writing it completely & am making additional researches. There is a certain point in that paper (one of several) which I am anxious to get into print as soon as possible as a mere ^{brief} statement, in order to establish a date. Several may be working in the same direction & I have conferred with others about it. Someone may therefore rush into print with my matter before my June paper is published. This has happened to me before & I want to avoid it this time, if not too late already. The Elec. World is no longer a place to publish such things.

It is of a technical nature, is short, probably less than a column, & may contain one simple line cut. Its subject matter will be included & elaborated on, in the June paper.

Yours truly
Carl Hering

Dear Dr. Hering:-

I have your letter of March 10th, in which you ask about the publication in the JOURNAL of short articles that are not official papers. We publish quite a few of these each month.

In regard to the brief statement which you wish to get in type in advance of your paper for the June meeting, I think we can easily handle this in the April JOURNAL if you can let us have it within the next four or five days. We go to press with some of the forms about the 17th or 18th of the month, and your item should be in our hands not later than that time.

Very truly yours,

E d i t o r .

Dear Mr. Metcalf

Yrs of the 13th rec'd. I enclose that note, with a small simple cut. It got to be a little longer than I expected, but hope it is not too long. If necessary I could cut out some paragraphs, but would prefer not, tho if it is to be done I would want to do this myself.

I expect to be in N. Y. Saturday & may drop in to see you, tho I expect to be very busy & may not get the time. I could however take an earlier train if by coming to your office, say about 10.15 am. I could help matters along materially.

Altho I express a decided difference with some physicists, I did not do so in any objectionable way. I wish to be able to refer to this note in my paper on the June meeting.

Yrs truly
Carl Hering

Do I get a chance to read proof?

Dear Sir:-

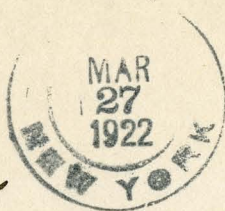

Your letter of March 15th, enclosing short article for publication in the April JOURNAL, is at hand and the manuscript is being set in type. I will send you a proof as soon as it reaches me, although there will not be very much time to wait for your O.K., because it is already rather late in the month for printing the Journal. However, if you find anything wrong with the proof, you might telegraph me and I would be able to make last minute corrections, after the matter was on the press.

Very truly yours,

E d i t o r.

Dear Mr. Melcalf

I return the proof enclosed. Both of the corrections are typographical. You did not include proof of the cut, but I presume you will compare it with the copy.

I am particularly anxious to have a single copy of this on or before Friday the 31st when I will be going out of town. As the April issue will not be out then

could you oblige me with a rough copy of some kind. The enclosed galley proof would answer if you could transfer the corrections to your copy, tho I would prefer a copy which includes the cut. I do not care what form it is in.

Yrs truly
Carl Hering
