

CARL HERING, D. Sc.
CONSULTING ELECTRICAL ENGINEER
1317 SPRUCE ST.

8

PHILADELPHIA, PA.

Feb. 24/25

Dear Mr. Metzger,

If you are using my filler this month on the Single Straight Conductor, please cross out the second sentence (1st to 5th line from bottom) of the 3rd paragraph, beginning with "This stored energy," to the end of the paragraph.

This is sufficiently important that if any reasonable expense is involved I will pay it. But I would not care to pay for printing a lot of sheets over again, so don't do that.

If not yet in type please be sure to have it crossed out.

I hope this is in time. I would like to have changed it, but that would give you a lot of trouble. But if you will not see it until April then let me have it & I will substitute something else for that sentence.

Sorry to trouble you.

Yours truly
Carl Hering

March 5, 1925.

Doctor Carl Herring,
1317 Spruce Street,
Philadelphia, Pennsylvania.

Dear Doctor Herring,

As I had no opportunity to use the enclosed filler in the March issue of the Journal, I am sending the proof to you so that you may modify it as you see fit in accordance with your letter of February 21st.

I have already noted two very obvious errors, not yet corrected, on the margin.

For your information, I am also enclosing a manuscript which we have received from F. W. Tyle, commenting upon your short article, "A Constant E. M. F. Without Sliding Contacts?" Will you kindly return this as soon as you have examined it.

EXAMINED AND APPROVED
FOR FILING
APR 4 1925 G. J. R.

Very truly yours,

E D I T O R.
