DEPARTMENT OF ELECTRICAL ENGINEERING

Reminder

STANFORD UNIVERSITY, CALIFORNIA

2 July 1931

Mr. G. Ross Henninger, Associate Editor
Electrical Engineering, A.I.E.E.
33 West 39th Street
New York, N. Y.

Dear Mr. Henninger:

I was pleased to have your letter dated
June 29, 1931:

Finding that I could not get around to writ-
ing you until today and knowing that you might be going
to press for the next issue pretty soon I did what I
could at once, which was to air-mail you last evening
the local press accounts as to what has happened:

- I Item in the Palo Alto Times
- II Item in the Stanford Illustrated
Review, issue of June 1931.

I have not resigned. Under the Stanford rules
of administration I will be retired from active service,
August 31, 1931 with the dual commission Emeritus Pro-
fessor of Electrical Engineering and Honorary Director
of the Ryan Research Laboratory. Our faculty members
are one and all retired from active duty at the close of
the university year in which they reach the age of 65.
I was 65 January 8, 1931.

My successor has not as yet been appointed.
Our Assistant Professor Theodore H. Morgan has resigned
to become Head of the Electrical Engineering Department
at Worcester Polytechnic Institute. This is not related
to my retirement. Professor Morgan's successor will be
appointed soon. No other electrical engineering faculty
changes in Stanford are expected now.

Mrs. Ryan joins in all good wishes.

Sincerely yours,

Harris J. Ryan

Harris J. Ryan
Executive Head
