STAFF DIRECTOR
 FIELD SERVICES

Dear Mr Patel,

I am very happy of the good outcome of your meeting with Professor Proebster on October 5th, especially your decision to held a Section meeting in November as a start of reactivating the section. As I mentioned in my letter of May 2 there is a byelaw requirement that election of section officers is held with reasonable intervals. Another part of the reactivation of the section should therefore be to elect Section Officers for 1990.

I must report at the February meeting of the Regional Activities Board about the status of the East Africa Section, which means that I must send in background material early January. It is therefore absolutely necessary that I before then have received a letter from you reporting from the November Section meeting and the election of Section Officers for 1990. Also I would need an activity plan for 1990 showing at least the minimum number of meetings required by the byelaws. I think the letter should be mailed middle December, in order to reach me in time. Could you also please on the same time send me a telex with a short summary of the content of the letter, in the case the letter should not reach me in time. You certainly could imagine the probable RAB decision, if I cannot make a positive report about concrete actions to reactivate the East Africa Section.

Last week I visited the Deputy Secretary General of ITU, Jean Jipguep, together with the Chairman of the CCIR Interime Working Party on Future Public Land Mobile Telecommunication Systems, Mike Callendar. This Working Party holds 2 week meetings two times a year in different parts of the world. The group comprises many of the leading radio and telecommunication experts from Europe, North America and Japan. Two years ago the meeting was held in a Developing Country - Costa Rica, and the Chairman wants to have a new meeting in a Developing Country early 1991.

At the meeting at ITU we agreed that a very interesting possibility would be to have a combined 1-2 day IEEE/ITU workshop on the importance of advanced mobile telephone technology for Developing Countries directly followed by a meeting of the Interime Working Party in Nairobi. However, an important background consideration at this discussion was my report of an active IEEE Section in Kenya and that I could discuss the matter with you when we met in Vienna last weekend. I therefore regret very much that you had to cancel your participation in Vienna. An other reason, why I urgently need information from you with confirmation of the reactivation of the East Africa Section, is that I promised Mr Jipguep and Mr Callendar to report back to them as soon as possible.

Yours sincerely

Re: Formation of Kenya Section, IEEE

Dear Mr. Suppers:

Dr. Walter Proebster, Director/Region 8 IEEE, has been in touch with us about the possibility of forming a Kenya Section of the IEEE.

In January of this year, a mailing went out to all known members in Kenya - based on a membership list received from Dr. Proebster. The enclosed signed petitions (16) were returned to us as a result of that mailing.

A few weeks ago, we heard from Robert Winton, Region 8/Secretary, suggesting that we forward the petitions to you. At the same time, he sent us another listing of members in Kenya - one which had 19 new names. We have, therefore, sent out another mailing and believe that this will result in about 10 - 15 additional petitions. Upon receipt of these additional petitions, we will forward them on to you.

Membership lists have changed surprisingly. Combining our petition responses with the IEEE print out lists, we assume IEEE members in Kenya as listed on the attached.

Yours sincerely,

KENYA SECTION STEERING COMMITTEE

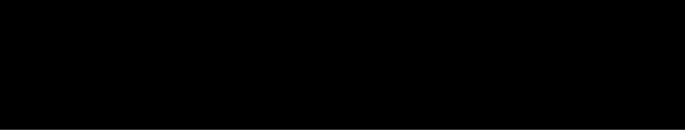

Dr. Gordon W. Brown, Secretary

cc: Dr. Walter Proebster

November 29, 1972

Mr. Charles S. Kuria

Dear Mr. Kuria:

With reference to your letter of November 13, your mailing address is being corrected to that shown above for all your IEEE mail. We want you to know that all publications will be forwarded via surface mail and there will be some delay before you receive your copies.

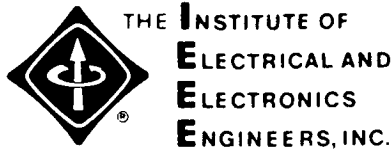

We are pleased to learn of your interest in forming a Section in Kenya and enclose information on the requirements to establish a Section. Our records show that there are presently 22 IEEE members in Kenya and we enclose a partial list of these members so that you may communicate with them and seek their assistance in formation of the Section. Also enclosed is a membership brochure. If additional copies are needed to provide to prospective members, we will be glad to send them to you, upon request.

If we can assist you further in your efforts to establish a Section in Kenya, please let us know.

Sincerely,

Emily Sirjane, Manager
Member Services

REGION 8

Dr. Gordon W. Brown
Secretary

OFFICE OF THE REGIONAL DIRECTOR
Dr. Walter E. Proebster

June 9, 1982

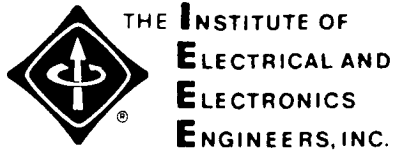

Dear Gordon:

with Bob Winton on vacation for the next weeks I would like to answer your letter to him dated May 21, 1982 and to Don Suppers of May 25, 1982.

We appreciate very much the efforts of you and your colleges to form a Steering committee towards the formation of the Kenya Section. We will keep you posted on the essential developments in our Region and would ask you to let us know in what way we can help you.

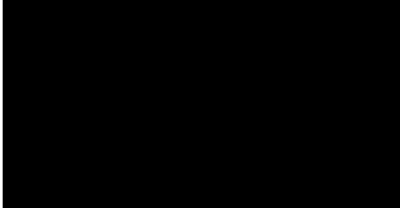

Contacts with several IEEE members in Africa have shown that there is considerable interest in the topic of Communication and Power Engineering. We communicated this interest to the IEEE Communication Society as well as to the IEEE Society of Power Engineering and found them receptive to the idea and proposal to plan an IEEE Technical Conference in Africa on this topic, preferably in Nairobi. This plans will be further discussed at our next Region 8 Committee Meeting in Copenhagen June 19 and 20 with representatives of the IEEE Societies which will meet with us there.

To this end it would be quite advantages to have the formal establishment of the Kenya Section already in this year. I would encourage you in your efforts to send out another mailing to your members who have not yet signed the petitions and I would assume that you include amongst your addresses also those members who have so far not yet responded.

REGION 8

OFFICE OF THE REGIONAL DIRECTOR
Dr. Walter E. Proebster

Page 2

Letter to Dr. Gordon W. Brown

I realize that it is impossible for this year to obtain 50 signatures which are normally required for Section formation, but I would hope that you will reach a number above 30, which would enable me to seek an exception ruling at one of our next Board of Directors meetings, hopefully already in November 1982 in New Orleans.

I would assume that Don Suppers will ask his staff to investigate why your membership lists have changed so surprisingly. Certain changes are to be expected but probably not as much fluctuation as you observed.

The identifying marks on the computer lists mean M Member, SM Senior Member, A Associate, M First year graduate, member grade, PM Pending Member: to be reviewed by the Admission and Advancement Committee, S Student Membership.

Again many thanks and best regards to you and your colleges

sincerely yours,

Walter Proebster

Kenya Section (In Formation)

2 January 1980

PLEASE REPLY TO:

Hamesh N. Buddhar

KENYA SECTION, I.E.E.E.

Dear Mr. Buddhar :

I have been asked by the Director of Region 3 of the I.E.E.E. to explore the possibility of forming a Kenya Section of the I.E.E.E. There are many advantages to doing so, among which are the following :

First, and perhaps most important, is the interchange of ideas and knowledge between members. Second, a Kenya Section would be entitled to receive financial support (not large, but significant) for meetings and operation. Third, a Kenya Section would have representation at Region 3 meetings.

How We Form Our Section

The key step in forming a Section is that at least 50 members must petition Region 3 to be permitted to form a Section. Right now, we have in Kenya about 30 members. To form a Section, I need your help. (Don't fret - it's painless.)

What I Need From You

I have enclosed a petition and information form which has two items to which you should respond. The purpose of the form is two-fold: first, to begin the petitioning process in the easiest way possible; second, to build membership to the level at which a Section can be formed.

Please fill out this form and return it to me, using the enclosed envelope as soon as possible. Thanks very much for your help.

Yours sincerely,

Dr. Gordon W. Brown, SM.IEEE, R.IEX, R.MIE
Organizing Secretary

PLEASE REPLY TO:

S. A. Pogruac

KENYA SECTION, IEEE

Dear Mr. Pogruac:

We have been asked by the Director of Region 6 of the IEEE to explore the possibility of forming a Kenya Section of the IEEE. There are many advantages to doing so, among which are the following:

First, and perhaps most important, is the interchange of ideas and knowledge between members. Second, a Kenya Section would be entitled to receive financial support (not large, but significant) for meetings and operation. Third, a Kenya Section would have representation at Region 6 meetings. And finally, we would work for eventual recognition of the IEEE in Kenya.

How To Plan For a Section

To start a section we would need a petition from sufficient numbers of members in Kenya. In January I sent a petition form to all known members. Since then we have (1) discovered that there are members we didn't know about and (2) that we are almost assured of being able to form a section.

But we do need your help to assure formation of a section.

What We Need From You

I have enclosed a petition and information form which has two items to which you should respond. The purpose of the form is two-fold: first, to begin the petitioning process in the easiest way possible; second, to build membership to the level at which a section can be formed.

Please fill out this form and return it to me, using the enclosed envelope, as soon as possible. Thanks very much for your help.

Yours sincerely,

Dr. Gordon M. Brown, SM.IEEE, M.IEE, R.IEG
Secretary/Steering Committee

Managing Director
Regional Activities

01 November 2006

Ms. Bashayer Al-Awad

Dear Ms. Al-Awad:

Congratulations! On behalf of the IEEE Regional Activities Vice President, Pedro Ray, it is a pleasure to inform you that the requirements of the RAB Operations Manual have been met, and the IEEE Kuwait Section – Women in Engineering Affinity Group has been formed. The effective date of this Affinity Group formation is 25 September 2006.

At this time, we are recording you as the Affinity Group Chair. When an election has been held, please report the name and member number of the new Affinity Group Chair to the IEEE using the online Officer Confirmation form at <http://www.ieee.org/scsreports>. If we can assist you in any way in the planning of the Affinity Group activities, please let us know.

We extend our best wishes for the successful operation of this Affinity Group.

Sincerely,

A handwritten signature in cursive script that reads "Cecelia Jankowski".
