Mr. A. A. Johnson
Westinghouse Electric Corporation
East Pittsburgh, Pa.

Dear Mr. Johnson:

REGIONS AIEE-IRE

The corrections you provided for the Region map have been made and will appear in the minutes of the Executive Committee meeting of December 14, 1961. Yesterday, I received the Revised Draft of the Constitution and Bylaws of the SREE. When these have been typed and duplicated, the minutes will be ready for distribution. We are hoping to get them in the mail by Friday of this week. Your corrected map will be enclosed.

Cordially yours,

N. S. Hibshman
Executive Secretary

Proposed Regions for AIEE-IRE Organization

Dear Mr. Hibshman:

Mr. Chase sent me copies of a map showing the outline of the regional boundaries for the proposed AIEE-IRE organization. I have reviewed this map and it indicates the regional boundaries very well with one exception. The exception is that the state of Connecticut is in what we have identified as Region 1 and not in Region 2. The line on your map, therefore, should be heavy between New York and the Connecticut boundary instead of including the state of Connecticut.

To be more specific the states should be identified in a tabulation and, where the regions overlap state lines, the counties must be identified. However, I judge for your present purposes you do not require this much of a detail breakdown.

Sincerely,

A. A. Johnson
