

109 Oakleigh Road,
Newton, Mass.,
Nov. 19, 1937.

Mr. H. H. Henline, Secretary,
Amer. Inst. Electrical Engrs.,
33 West 39th St.,
New York City.

Dear Mr. Henline:

I am presenting to the Engineering Societies Library a copy of my recently issued book on "Diagonal Functions", which will be forwarded today.

It represents an entirely new branch of applied mathematics, concerning which you can get an outline idea from the enclosed reviews of it.

This first issue embraces only 100 copies, which will not be repeated, even if there be a demand for the book. For another issue would call for the inclusion of a little additional matter, new paging and other small changes in details. But thus far, no errors have been discovered.

Very truly yours,

Chas. F. Clarke,

Charter Member, A. I. E. E.

Mr. Charles L. Clarke
109 Oakleigh Road
Newton, Mass.

Dear Mr. Clarke:

We sincerely appreciate your courtesy in sending
a copy of your book entitled "Diagonal Functions" to the
Engineering Societies Library, as noted in your letter of
the 19th.

Very truly yours,

National Secretary
