Dear M. I. Olken,

We are a group of IEEE members at the Faculty of Electrical Engineering in Skopje, Republic of Macedonia. Up to now we were members of Yugoslav Section - Ljubljana.

Now Yugoslavia is falling apart into many units - countries with different currencies some of them internationally recognized. The currency flow between different parts of former Yugoslavia is cut for long time. In Republic of Macedonia we have currency named "denar", which is not yet internationally exchangeable.

In month of February 1992 we all met together (about 15) and have discussed the situation. We all agreed that the best solution for us is to be organized in new, Macedonian section. There are many good reasons for it, to number only some:

-The number of IEEE members in Faculty of Electrical Engineering by our estimation is about 20, and in whole Macedonia up to 30. Perhaps IEEE service knows the right number. We all have postal code number beginning with "9".

-There are good possibilities to broaden the membership in Macedonia among the electrical engineers and students,

-We all hope it will be possible to pay our dues in our own currency, which is very attractive for us.

-We hope Republic of Macedonia will soon be internationally recognized country, and now is politically independent, and it would be practical if we form our own section.

We have not written to You up to now because we thought that the political situation will be more clear. Now we consider that it is time to solve our problem with our membership.

In case of positive opinion from you, please take all steps in this direction and write us what shall we do. We are ready to meet again and to propose a chairman for Macedonian section.

With best regards
