Precision Coaxial Terminations. High & Low Power.

AN EXTREMELY

BROADBAND

DIODE SWITCH

The CMC Model 108 Coaxial Solid State Microwave Switch accomplishes high speed, efficient SPST switching over the frequency range of 100 to 2500 Mc with minimum control power requirements.

This device is also particularly useful as a voltage controlled attenuator, as an RF Modulator and as a reflective switch.

Blocking capacitors are provided in the enclosed transmission line to isolate the biasing or modulation circuitry from the microwave network. Units without blocking capacitors can also be constructed.

CMC Model 108 has typical isolations of:

30 db. min. from 100 to 500 Mc.
20 db min. from 500 to 1250 Mc.
18 db min. from 1250 to 1800 Mc.
14 db. min. from 1800 to 2500 Mc.

Insertion loss from 250 to 2000 Mc is typically less than 2 db.

Switching speed is less than 10 nanoseconds.

RF power handling capacity is 4 watts CW and 150 watts peak (.001 duty cycle).

Temperature range is -55° to $+90^{\circ}$ C.

CMC also has an extensive line of Diode attenuators, Ferrite circulators, Ferrite isolators, Ferrite phase shifters, Diode phase shifters, Parametric amplifiers and millimeter solid state devices.

cover

Educational overtones seep into the **Grid** from all directions. This time, it's geography, a brief refresher on the general configuration of the 7th Region with its various sections and subsections. As noted, this is timed to remind

you about going to the 7th Region Conference and the World's Fair. Both a program for the former and a pictorial insert about the latter are included in this issue of the **Grid**.

MEETING CALENDAR

SAN FRANCISCO SECTION

8:00 P.M. • Friday, May 11

(Joint with PGRQC, USNPGS Student Branch, see below)

SAN FRANCISCO SECTION

• Tuesday, June 12*

Annual meeting—details to be announced

*Note change of date

PROFESSIONAL GROUPS

Antennas & Propagation

8:00 P.M. • Wednesday, May 9

"Theory and Design of H-Guide Antennas"

Speaker: George N. Voronoff, microwave design engineer, Dalmo Victor Place: Room 101, Physics Lecture Hall, Stanford University

Meet-the-Speaker Dinner: 6:30 P.M. (Cocktails 6:00 P.M.), L'Omelette Restaurant, 4170 El Camino Real, Palo Alto

Reservations: Sandra Torrey, DA 1-3300, Ext. 392

Audio

8:00 P.M. • Wednesday, May 2

(Joint meeting with Acoustical Society of America and Audio Engineering Society)

"Acoustic Measurements—What and How"

Speaker: George T. Wilson, Boeing Aircraft Co., Seattle

Place: Pacific Telephone & Telegraph Auditorium, 140 New Montgomery Street, San Francisco

Dinner: 6:30 P.M. (Cocktails 6:00 P.M.), place to be announced

Reservations: Herb Ragle, EM 9-7111, Ext. 596

Broadcasting

6:30 P.M. • Tuesday, May 1

Report and inspection tour of common TV transmitter site and tower of KCRA-TV, KXTV, and KOVR

Place: Tony's, one block from bridge, Walnut Grove. Highway 24 south from Sacramento or north from Oakland and Rio Vista to foot of Sacramento River Levee. (1½ hr from S.F.)

Dinner: 6:30 P.M. (Cocktails 6:00 P.M.), Tony's (\$4.50)

Reservations: James Gabbert, KL 2-1013; Paul Gregg, LY 3-0800; or Hugh Granberry, EM 8-4681, by April 26

Electronic Computers

8:00 P.M. • Tuesday, May 22

"Error-Correcting Codes and a Particular Physical Realization"

Speakers: Dr. Bernard Elspas and William K. English, SRI

Place: Lockheed Auditorium, 3251 Hanover Street, Palo Alto

Dinner: 6:00 P.M., The Red Shack Hofbrau, 4085 El Camino Way, Palo Alto

Reservations: None required

Engineering Management

8:00 P.M. • Wednesday, May 9

"Management of a Research Activity"

Speaker: Dr. Herbert Trotter, president, GT&E Laboratories

Place: Room E-6 Education Building (corner of Escondido Road and Lasuen Street), Stanford University

Dinner: 6:00 P.M., L'Omelette Restaurant, 4170 El Camino Real, Palo Alto

Reservations: IRE office, 321-1332

MEETING CALENDAR

Information Theory

8:00 P.M. • Thursday, May 10

"Mind, Machine, and Soul"

Speaker: Dr. Louis Fein, consultant

Place: Talisman Room, Caravan Inn, 4375 El Camino Real, Mountain View

Dinner: 6:00 P.M., Talisman Room, Caravan Inn

Reservations: Mrs. Beryl Lelo, DA 6-6200, Ext. 2944

Instrumentation

8:00 P.M. • Wednesday, May 23

Lecture No. 3

"Storage: Processing and Printout"

Speakers: Robert N. Flanders, Dymec, and Douglas Wilcox, Precision Instruments

Place: Hewlett-Packard Co., 1501 Page Mill Road, Palo Alto (main lobby)

Meet-the-Speaker Dinner: 6:00 P.M., L'Omelette Restaurant, 4170 El Camino Real, Palo Alto

Reservations: None required

Instrumentation

8:00 P.M. • Wednesday, June 27

Lecture No. 4

"System Programmers and Summary"

Speakers: To be announced

Place: Hewlett-Packard Co., 1501 Page Mill Road, Palo Alto (main lobby)

Meet-the-Speaker Dinner: 6:00 P.M., L'Omelette Restaurant, 4170 El Camino Real, Palo Alto

Reservations: None required

Radio Frequency Interference

8:00 P.M. • Wednesday, May 16

"Radio Frequency Interference Measurements in the Microwave Spectrum—Power Density and Field Intensity Concepts"

Speaker: Robert Friedman, manager, applications engineering, Polarad Electronics Corp., Long Island City, New York

Place: Lockheed Auditorium, 3251 Hanover Street, Palo Alto

Meet-the-Speaker Dinner: 6:30 P.M., Rickey's Studio Inn, 4219 El Camino Real, Palo Alto

Reservations: Mrs. Pat Hanson, DA 1-2280

Reliability & Quality Control

8:00 P.M. • Friday, May 11

(Joint with San Francisco Section and Student Branch U. S. Naval Postgraduate School)

Dinner Meeting

Speaker: Dr. Royal Weller, director of engineering, space-systems division, Lockheed Missiles and Space Co., Sunnyvale, Calif.

Place: Officers' Club, U. S. Naval Postgraduate School, Monterey, Calif.

Cocktails: 6:30 P.M. Dinner 8:00 P.M. prime ribs or lobster, \$3.50 in adv.

Reservations: J. M. Alderman, Arinc Research, 467 Hamilton Ave., Palo Alto, DA 1-0390

Reliability & Quality Control

• Fri., Sat., May 11, 12

Third Annual Bay Area Reliability Seminar

Seminar: "Today's Reliability Challenge"

Program: See page 7

Place: U. S. Naval Postgraduate School, Monterey

Space Electronics & Telemetry

8:00 P.M. • Tuesday, May 15

Subject and speaker: To be announced

Place: Lockheed Auditorium, 3251 Hanover Street, Palo Alto

Dinner: 6:30 P.M., Camino Bowl, 2025 El Camino Real, Mountain View

Reservations: Cynthia Chaney, DA 6-4350

seventh region

YOU'RE INVITED

This year's 7th Region Conference is being held in the World's Fair city of Seattle. Starting with the magnetic nature of that event, the Conference committees have considered several other factors that should help to make the affair one of the best in the Region's history.

For example: the 50th Anniversary of IRE makes this a special year for electronic people everywhere; the IRE board of directors is meeting there during the event, a fact that provides distinguished speakers for the luncheons; and finally, the governor of Washington has proclaimed May 25 Electronics Day.

In the formulation of the program, which is outlined on a following page, the intent announced by the committee has been to seek a generally high standard by concentrating on invited papers. Thus, an international program has resulted, representation from Europe being included.

No technical exhibits have been organized because of the availability of the World's Fair, which will have excellent scientific and technical displays. Information on Century 21 will be found in an insert included in this issue.

IRE personnel responsible for organization of the Conference have included: D. K. Reynolds, 7th Region director; L. C. Perkins, Conference chairman; W. J. Siddons, Seattle Section chairman; Tom Dalby, technical program chairman; Rush Drake, arrangements chairman; Burt Porter and Michael Seidl, special activities co-chairmen; and Mrs. J. K. Schloss, women's events chairman.

All have extended a warm welcome to visit Seattle May 24, 25, and 26.

Mt. Rainier, one of the peripheral attractions accessible to 7th Region Conferencees

7th region conference

THE PROGRAM

Wednesday, May 23, 1962

1-9 P.M.—Registration

Olympic Hotel, mezzanine. (All papers to be presented at the Olympic Hotel)

Thursday, May 24, 1962

9 A.M.-12 Noon

2A (Spanish Ballroom)

ANTENNAS

Moderator: Nicholas Yaru

Speakers: C. J. Sletten, P. Blacksmith, Jr., C. A. Bartholomew, P. A. Jensen, and E. D. Burnett

3A (Georgian Room)

ELECTRONICS IN EDUCATION

Moderator: T. L. Martin

Panel: W. W. Harman, D. K. Weaver, A. V. Eastman, and D. O. Peterson

12:15 P.M.

WORLD'S FAIR LUNCHEON

Grand Ballroom, Olympic Hotel

ELECTRONICS, MACHINES, & MAN

Patrick E. Haggerty, president, IRE

2-5 P.M.

1A (Pacific Evergreen Room)

PROPAGATION & IONOSPHERIC PHYSICS

Moderator: R. A. Helliwell

Speakers: R. W. Knecht, T. W. Flowerday, D. D. McKibbin, R. L. Smith, L. H. Rorden, R. A. Helliwell, and John J. Nisbet

1B (Georgian Room)

SATELLITE COMMUNICATION

Moderator: G. H. Keitel

Speakers: S. H. Reiger, Ralph L. Clark, and Robert T. Haviland

2C (Spanish Ballroom)

ADVANCED CIRCUIT-PACKAGING TECHNIQUES

Moderator: J. K. Schloss

Speakers: Steward S. Flaschen, G. J. Selvin, Ernest C. Singletary, and John McKinley

6-8 P.M.

COCKTAIL PARTY

Spanish Ballroom, Olympic Hotel

Friday, May 25, 1962

9 A.M.-12 Noon

2B (Evergreen Room)

DEVICES

Moderator: W. G. Shepherd

Speakers: C. M. Veranda, Robert W. DeGrasse, Guy Convent, and James C. Axtell

3C (Georgian Room)

ELECTRONICS IN BUSINESS

Moderator: H. W. Haynes

Speakers: Warren Hume, Norman Ream, H. Reinaud, John H. Moller, and John Diebold

3E (Spanish Lounge)

STUDENT PAPERS

Moderator: I. J. Sandorf

L. C. Perkins, 7th Region Conference chairman

12:15 P.M.

LUNCHEON

Spanish Ballroom, Olympic Hotel
SALUTE TO THE 50TH ANNIVERSARY OF IRE
STUDENT PRIZE-PAPER AWARD

Speaker: Lloyd V. Berkner, past president, IRE
2-5 P.M.

1D (Pacific Evergreen Room)

SPACE EXPERIMENTS & COMMUNICATION

Moderator: S. H. Reiger

Speakers: R. C. Heyser, M. H. Brockman, D. W. Swayze, R. W. Waller, and Douglas Jones

2D (Spanish Lounge)

SECONDARY POWER

Moderator: W. C. Scott

Speakers: James A. Rudy, A. Klammer, Jr., G. H. Rohrback, and Robert T. Carpenter

3D (Georgian Room)

ELECTRONICS IN 2012 A.D.

Moderator: Lester M. Fields

Speakers: Nathaniel Rochester, Daniel E. Noble, and W. D. McGuigan

8 P.M.

PUBLIC LECTURE

World's Fair Playhouse

TODAY'S SCIENCE—TOMORROW'S TECHNOLOGY
Lee Alvin DuBridge, president, California Institute of Technology

Saturday, May 26, 1962

9 A.M.-12 Noon

1C (Georgian Room)

RADIO ASTRONOMY

Moderator: R. S. Lawrence

Speakers: J. D. Warwick, G. W. Swenson, J. M. Chisalm, and J. W. Findlay

2E (Colonial Room)

RADIATION EFFECTS ON ELECTRONIC

EQUIPMENT

Moderator: W. L. Brown

Speakers: S. F. Singer, J. M. Denney, J. C. Lee, and G. L. Keister

— END —

meeting ahead

PICKING THE TIME

For an early May meeting, PGEM will present Dr. Herbert Trotter, president of GT&E Laboratories, who will speak on the subject, "Management of a Research Activity." See the Calendar for particulars—page 4.

The rapid technological progress in the 1960's and 1970's puts an increased burden on corporations working in the frontiers of science. The rate of change in products and services means that the corporate research, development, and engineering efforts have to be tightly coupled to provide good new products to keep the company competitive.

According to Trotter, doing research alone is not an answer, and the payoff

comes from being able to work on the right things in research at the right time with the right men, and then taking them out of research again at the right stage of development and pushing them through engineering into production and sales.

As he will point out, it is this technical continuity of effort, with a singleness of purpose, that will give a profitable operation in our changing technical environment.

meeting ahead

DIGITS ALL THE WAY

Lecture No. 3 in the current instrumentation systems seminar of PGI, featuring Messrs. Flanders and Wilcox, is scheduled for late May. See page 5 for details in the Calendar. The scope of this lecture will be restricted to digital data processing and recording.

Analog information, monitored by a transducer and made available in digital form by an analog-to-digital converter, has frequently to be recorded in a semi-permanent storage media. The most common forms of storage utilize printed, punch-card, perforated-paper-tape, and digital-magnetic-tape techniques.

Data in these forms may be stored and later reproduced with no degradation for processing, normalizing, computing, translating, graphical recording, or any combination of the above. Supplementary data may be simultaneously recorded with the measurement for identification or system control.

Basic system elements that perform these functions, and will be covered, are: Analog-to-digital converter (covered in previous lecture), output coupler, output device, storage media, read-in device, input data processor, translator converter, command recognition/system control, output accessory, and output device.

meeting ahead

ERROR-CORRECTING CODES

Meeting later in May (see Calendar, page 4) PGECE will contemplate "Error-Correcting Codes & a Particular Physical Realization," a two-part discussion with Dr. Bernard Elspas and William K. English of SRI as speakers.

Recent advances in the theory of error-correcting codes have made it possible to implement fairly sophisticated error-correction schemes with relatively simple encoding and decoding equipment. A versatile encoder/decoder for studying these codes was designed and built at Stanford Research Institute. The machine, in its realization, is a self-contained unit capable of performing the encoding and decoding (correction)

(Continued on page 8)

FILTER

PERFECTIONISTS

Communicom offers filters and networks, custom designed for you by a group of specialists. Their cumulative years of experience have taught them the importance of constantly striving for the impossible in performance characteristics and production efficiency and being satisfied only when they have all but achieved it.

If you are beset with problems in design and/or manufacturing of: Crystal or L-C Filters—Low-Pass, High-Pass, Band-Pass, Band-Reject— or Networks, communicate with us. Most likely we can propose solutions that will make you glad you did.

HOW TO
MONITOR
A MISSILE—
AT 15,000 MPH

Spectacular as it is, a Titan take-off from Canaveral is only one end of the story. Moments after the shoot, nine thousand miles downrange, an airborne monitoring team is alerted to record the other end of the story as the re-entry vehicle plunges into the atmosphere at 15,000 mph.

Aboard the re-entry monitoring aircraft, a battery of photographic, photoelectric, and radiometric devices captures the dramatic end of the flight. A P.I. instrumentation tape recorder, operated by an Avco-Everett Research Laboratory monitoring team, is used to preserve on magnetic tape a precise record of important radiometric and time-sequence information... data which is essential in the development of advanced re-entry vehicles and in the country's anti-missile program.

One reason a P.I. recorder was selected for this program is that it provides full-size instrumentation performance in a fraction of the space. You'll be interested, if you record any type of scientific data, in other characteristics of P.I. recorders. For details, write for our current brochure.

Above — Photo of Titan missile re-entry. Below — Recorder installation aboard the monitoring aircraft. Photos courtesy of Avco-Everett Research Laboratory.

**PRECISION
INSTRUMENT**

SAN CARLOS, CALIFORNIA / LY 1-4441

P.I. Invites inquiries from senior engineers seeking a challenging future.

functions for any cyclic codes up to 63 bits in length, with up to 16 check bits per word.

The talk will consist of two parts—in the first, Elspas will give an introductory survey of the theory and properties of cyclic codes for the detection and correction of error bursts and random errors. The general principles of encoding and decoding equipment for such codes will be described.

The second part will be a discussion by English of the type of all-magnetic logic circuitry used in the machine and a brief description of the machine itself, followed by a demonstration of its capabilities.

meeting ahead

H-GUIDE ANTENNAS

Next week, PGAP will meet to hear from George N. Voronoff on the "Theory & Design of H-Guide Antennas." Details are in the Calendar, page 4. Voronoff will provide a general discussion of H-guide and its properties, followed by a coverage of the theory of slot radiators in the H-guide and application to the synthesis of two-dimensional arrays having pencil beams, shaped beams, and monopulse patterns.

He will cover measured performance of X-band and K_a-band antenna models, launching methods and efficiencies, 180-

Elspas

Voronoff

deg H-guide bend, and general problem areas.

Voronoff is presently a microwave design engineer with the antenna-research group at Dalmo Victor Co. He holds a 1958 BSEE degree from the University of California at Berkeley.

meeting ahead

ACOUSTIC MEASUREMENTS

Early in May, at a time and place listed in the Calendar, page 4, there will be a joint meeting between PGA, the newly formed chapter of the Acoustical Society of America, and AES. Attendees will be exposed to a perennially fascinating subject: "Acoustic Measurements—What & How."

The speaker, George T. Wilson, associated with Boeing in Seattle, is also an associate professor at the University of California, Berkeley, doing research on sound transmission.

LETTERS TO THE EDITOR

120 Main St.
Erdem Dzuo
Gobi Desert
Mongolia

Editor, the Grid

Dear Sir:

Don't you think that having the Sig-mund Freud Award emblazoned on a tortilla is just a little corny?

Miriam Taco-Taco

We think you must be kidding.—Ed

Manager, the Grid

Dear Sir:

Thank you for your letter of March 20 and the copies of the March 1 and March 15 issues of the **Grid**. Once again, these issues are up to the usual high standard of quality of the **Grid** and everything else that seems to go on in IRE's Region VII.

You will be happy to know, I am sure, that prior to the two boards' voting to submit the question of merger to the two memberships, the proposed name of the society was changed to "Institute of Electrical and Electronic Engineers." This is the name that will appear in all the documents being sent to our membership as a Supplement to the April Proceedings.

P. E. Haggerly
President, IRE

A MANY-SIDED ORGANIZATION TO SERVE YOU

Here, specialists from our 93-man crew each devote full time and attention toward their particularly skilled contribution to your printing requirements. This gives you the services of the area's outstanding planners, assembly and press departments, bindery and delivery facilities. An unusual familiarity with the special needs of engineering publications—ranging from sales literature to technical manuals—helps us to give unmatched service. Try us at DA 3-3191.

10% ACCURACY

over
ENTIRE METER SCALE!

1 mv - 250 v, 20 cps - 20 kc

22 years of experience in designing and producing laboratory-type Electronic Voltmeters has made possible this Ballantine Model 300-G.

This is the most precise instrument in our entire line of sensitive wide-band Electronic Voltmeters.

Price \$315

BALLANTINE Model 300-G SENSITIVE ELECTRONIC VOLTMETER

- Top accuracy of 1% over entire meter scale from 1 mv to 250 v and over the band of 20 cps to 20 kc. Better than 2% to 1,000 volts and for the wider band of 10 cps to 250 kc.
 - High input impedance: 2 megohms shunted by 15 pF, except 25 pF on lowest voltage range.
 - Long life: Several thousands of hours of operation without servicing or recalibration.
 - Does not require stabilized input voltage. Less than 1/2% change in indication with power supply change from 105 v to 125 v.
 - Five inch, mirror-backed, easy-to-read meter. Only two scales with mirror between. One is 1 to 10 for volts, and the second is 0 to 20 for decibels.
- Also available in 19 inch relay rack Model 300 G-S2 at \$325.

Write for brochure giving many more details

DISTRIBUTOR FOR VACU-BLAST

Stanford Research Institute is seeking Engineers or Physicists experienced in

WEAPONS SYSTEMS EVALUATION to:

- Analyze operational capability of proposed systems to provide technical support to R & D planners.
- Examine technological and environmental implications upon over-all systems capability.

A degree in Physics or Engineering is required. Advanced degrees are preferred. In addition, a minimum of 3-5 years of systems experience is desired. Emphasis is placed on a willingness to become suitably familiar with a wide range of technological areas to evaluate their implications upon systems performance.

Please send résumé or call

STANFORD RESEARCH INSTITUTE

Menlo Park, California

DINING-OUT DEFINITIONS

trav'el ing wave (trav'el'ing wāv), *n. fem.*
Peripatetic member of naval forces; more attractive versions often seen with escorts at Veneto's. Also refers to farewell gesture made by engineers as they depart for R&D [refreshment and dining] at Veneto's and adj. Gondola Room.

Architects drawing of new Granger Associates plant

grid swings

IT IS REPORTED:

Excavation and grading have begun in Stanford Industrial Park for Granger Associates' new engineering laboratories, assembly plant, and general offices. The two-story, 65,000-sq-ft building by Palo Alto architects Clark, Stromquist, Potter, and Ehrlich, will be erected on an 8½-acre plot leased from the university on the southeast side of California Avenue at Amherst Street.

Varian Associates and Compagnie Francaise Thomson-Houston of Paris, France, have announced plans to create in France a jointly owned company to supply microwave tubes principally to the European market.

Among all American universities, Stanford now ranks fourth nationally in the total number of advanced degrees conferred annually in engineering, according to a survey by the U. S. Office of Education reported in the current Journal of Engineering Education. The University of California at Berkeley also ranks in the top 10 nationally.

Precision Instrument Company has established district sales offices to cover six western states in Palo Alto, Los Angeles, and Albuquerque, New Mexico. William H. Butler has been named sales manager of the San Francisco district sales office, located in Palo Alto.

Vega Electronics Corporation has appointed a separate, newly formed sales company to market its Vega-Mike wireless microphone systems.

C. Arthur Foy, previously marketing manager for Vega, heads the new company, named Vega Microphone Sales Company, located in Los Altos, Calif.

A major reorganization of the research laboratories of Lockheed Missiles & Space Company was announced recently. The new organization, known as research and engineering, is being headed by J. P. Nash.

Research area of the new organization will be headed by Wayland C. Griffith and the engineering area will be headed by Frank J. Bednarz.

Clipper for 160 amps

The XD- 66

Designed specifically for clipper diode service, the new Central XD-66 features a special thoriated tungsten filament for longer life with high peak handling capability. At 80 kv P. I. V., the XD-66 handles 160 amps peak (with RMS ratings of 4 and 8 amps, respectively, for the available air- and water-cooled versions). Also rated as a high current rectifier. Write for complete data.

SPECIAL TUBES
Our engineering staff is available to design and custom produce special power tubes to meet your requirements.

NCR

RESEARCH SOLID STATE PHYSICS

New programs in semi-conductor and thin films research have created ground-floor opportunity for qualified and vigorous research scientists in NCR's expanding research and development effort. Our interest is not temporary, rather it is an element of the stable long-range viewpoint that has led to 78 years of leadership in the field of business equipment and systems. Perhaps you qualify to become a part of this respected organization.

Openings in our Physical Research Department include:

PHD in physics, with at least five years experience in semi-conductor component research and development, a theoretical understanding of semi-conductor (silicon and germanium) physics, research and development experience in the semi-conductor device fabrication techniques such as diffusion, alloying, masking etching, and in particular be familiar with the epitaxial formation of multilayer semi-conductor structures.

Assignment involves technical leadership for a program in molecular electronics which will first be concerned with the investigation and exploitation of the epitaxial technique to determine its limitation and capabilities as related to the fabrication of functional and semi-conductor structures.

PHD in physical chemistry with three years of experience in the areas of electro-chemistry, preferably as applied to the formation of thin magnetic films. He should be familiar with the process of electro-deposition as related to magnetic materials and alloys, and have considerable understanding of magnetic theory, processes of crystal nucleation and growth as they are related to the formation of metallic electro-deposited films. It is also desirable to have technical familiarity with x-ray and electron diffraction examination and analysis methods, so that these skills may be brought to bear on the problem of the relationships of film composition and crystalline structure to the magnetic characteristics of electro-deposited films.

PHD in physical chemistry, with approximately five years experience and theoretical understanding of the problems of materials preparation, structural and compositional analysis and interpretation, and methods of materials evaluation. Particular emphasis should include solid state materials, such as semi conductors, magnetic materials, superconductors, and dielectrics.

To investigate these and other openings, write to:

AN EQUAL OPPORTUNITY EMPLOYER

HIGH VOLTAGE POWER SUPPLIES INSULATION TESTERS PULSE MODULATORS

1,000 — 600,000 volt Power Supplies
Regulated or Unregulated

With extensive experience in high voltage techniques KILOVOLT CORP. brings to bear the very latest knowledge in the design and development of power supplies for specific applications.

KILOVOLT CORP. is prepared to recommend the standard unit best adapted to your needs or custom design and construct an especially suited power supply, insulation tester, or pulse modulator.

KILOVOLT CORP. equipment has long been used in a wide range of industry and enjoys an exceptional record of trouble-free performance under the most severe conditions. All units are engineered to provide the maximum protection to the operator and the equipment.

We'll be happy to help work out your high voltage power and pulse modulator needs. Call on us without obligation.

CHOICE OF THE PENINSULA'S LEADING ELECTRONIC FIRMS

Palo Alto Transfer's experienced movers with specialized equipment take the work and worry out of any moving job. Delicate electronic equipment, for example, travels safe and secure in a custom-built electronic van. Whether your next move involves electronic equipment, household goods or an entire office or plant, choose Palo Alto Transfer . . . Teamed with Allied Van Lines, world's largest mover, to deliver the goods anywhere.

IRE MEETINGS SUMMARY

May 8-10 — **Electronic Components Conference.** Marriott Twin Bridges Hotel, Washington, D. C. No exhibits Program: Henry A. Stone, Bell Tel Lab, Murray Hill, New Jersey. Proceedings \$7, order from IRE Headquarters.

May 14-16 — **NAECON** (National Aerospace Electronics Conference), Biltmore Hotel, Dayton, Ohio. Exhibits: Robert J. Stein, 19 Beverly Place, Dayton 19, Ohio. Program: George A. Langston, 4725 Rean Meadow Dr., Dayton, Ohio. Proceedings: \$6, order from IRE Office, 1414 E. Third St., Dayton 3.

May 14-17 — **Symposium on Thermionic Power Conversion.** Antlers Hotel, Colorado Springs, Colorado. No exhibits. Program: V. C. Wilson, General Electric Co., Schenectady, N. Y.

May 24-26 — **Seventh Region Conference.** Olympic Hotel, Seattle, Washington. Exhibits: Century 21 Fairgrounds. Program: T. G. Dolby, 3220 99th N.E., Bellevue, Washington.

NON-IRE LOCAL EVENTS

May 28-30 — **First Annual Convention of the American Association for Contamination Control.** Jack Tar Hotel, San Francisco. Registration and exhibits: Donald M. Peterson, Central Vacuum Corporation, 3008 E. Olympic Blvd., Los Angeles 23, California.

May 27-June 2 — **University of California Extension**, fifth annual leadership laboratory in human relations and supervisory skills. Ojai Valley Inn, Ojai. Information: University of California Engineering and Physical Sciences Extension, UCLA, Los Angeles 24.

PAPERS CALLS

May 15 — 800-word abstracts, ten copies, and biography of author for 9th National Symposium on Reliability and Quality Control (San Francisco; Jan. 22-24, 1963). Send to: Leslie W. Ball, Boeing Co., P.O. Box 3707, Seattle 24, Washington.

June 1 — 50 word abstract for 15th Annual Conference on Engineering in Biology and Medicine (Chicago; Nov. 4-7). Send to: Program Committee, P.O. Box 1475, Evanston, Illinois.

June 1 — 350-word summary with subject, title, and biographical note, all in triplicate, for 2nd Canadian IRE Symposium on Communications (Montreal, Nov. 16-17). Send to: Allan B. Oxley, chairman technical program, Box 802, Montreal, Quebec.

June 11 — 400- to 500-word abstracts in triplicate and 50-word summaries for NEREM (Boston; Nov. 5-7). Send to: I. Goldstein, Raytheon Co., Box 555, Hartwell Road, Bedford, Mass.

10 TURN RESOLUTION WITH ONLY 1½ TURNS!

(ACTUAL SIZE)

SPECIFY FLUKE PRECISION POTENTIOMETERS!

THESE new time-savers combine the advantages of speed, high resolution, linearity and AC response . . . in a fraction of the space required for standard helical potentiometers . . . in fact less space than many single turn, low resolution potentiometers. The unique FLUKE patented design results in all the most looked for capabilities; for example, thin card-type windings reduce residual reactance and allow operation at much higher frequencies than other potentiometers with similar DC specifications. The 1½ turn control of the entire adjustment range allows substantial time savings in frequently adjusted or multiple potentiometer installations such as analog computers, simulators and data logging systems. For built-in dependability, precision and all around performance . . . specify FLUKE reliable potentiometers.

20A RESISTANCE RANGE IN OHMS: 100 to 25K
 RESOLUTION: 1K and above, better than 0.02%
 POWER RATING IN WATTS: 2 at 20°C
 PRICE: \$8.50

21A RESISTANCE RANGE IN OHMS: 30K, 40K and 50K
 RESOLUTION: 30K and above, better than 0.008%
 POWER RATING IN WATTS: 3 at 20°C
 PRICE: \$10.00

22A RESISTANCE RANGE IN OHMS: 1K to 100K
 RESOLUTION: 1K and above, better than 0.02%
 PRICE: \$15.00

30A PROVIDES 40 TURN RESOLUTION WITH ONLY 2½ TURNS
 RESISTANCE RANGE IN OHMS: 1K to 100K
 RESOLUTION: 1 part in 50,000, or better than 0.002%
 POWER RATING IN WATTS: 5 at 20°C
 PRICE: \$30.00

Available from stock. Compatible knobs and resettable dials also available. Write, wire or phone for your nearest local stock and short form catalog F-162.

WELCOME TO THE FUTURE!
Give your imagination full rein... just imagine the most creative architects, scientists, designers, artists, builders... joining talent and effort! Envision, then, the tangible results of this, the world's most startling prediction of our life in 2000 A.D.

This glittering panorama of the Twenty-First Century awaits you in a setting artfully and brilliantly designed. It's America's Space-Age-World's Fair... unprecedented... unforgettable... fun-filled, keyed to the whole world's enjoyment and enlightenment.

From the breathtaking displays of space-age wonders to the spectacular Gayway, from the exotic shops and restaurants of many lands to the sparkling parade of world-famous entertainers, there's a family-full of fun and fascination. Where the most vivid imagination leaves off, Century 21 takes over...

and you're ready for it!
CENTURY 21 EXPOSITION
SEATTLE, WASHINGTON, U.S.A.

APRIL 21 TO OCTOBER 21, 1962

THE WONDROUS WORLDS OF CENTURY 21

WORLD OF SCIENCE

unveils a dynamic account of man's relationship to scientific progress. This \$9,000,000 project of the United States Government is the most extensive science exhibit ever assembled. A simulated rocket journey into space in the world's first "spacearium" is one of many features here

HIGH-SPEED MONORAIL, the world's first, whisks visitors from downtown Seattle to the Exposition grounds... more than a mile... in just 96 seconds. Century 21 visitors will thrill to this premiere full-scale operation of a high-speed, mass transportation system of the future.

by a restaurant and observation deck which revolves 360 degrees per hour to present an ever-changing panorama of Seattle, Puget Sound and nearby mountain ranges.

WORLD OF CENTURY 21, a \$7,500,000 presentation of the State of Washington, offers an unparalleled opportunity to see the sights and hear the sounds of the century ahead. The world's greatest designers are creating an environment of the future, permitting visitors to "step into the next century."

Plan to make Century 21 a highlight of a complete WASHINGTON STATE VACATION. There's a warm welcome awaiting you in Washington State, where everything is just "hours apart."
It's the Western-Most!

WORLD OF ENTERTAINMENT offers a continuing international parade of performing arts, sports and spectacular events, while the Gayway 21 provides a dramatic change of pace with rides, games, music and refreshments reminiscent of "yesteryear."

WORLD OF COMMERCE AND INDUSTRY gives an exciting, graphic portrayal of the technological advances of many nations and industries.

WORLD OF ART will present a magnificent panorama of painting and sculpture from the Renaissance to the Space Age.

BOULEVARDS OF THE WORLD are lined with colorful shops and restaurants representing a myriad of countries and cultures... a veritable world tour.

Don't forget to attend the
**7th REGION I. R. E. CONFERENCE
IN SEATTLE**
